## 2016 FINANCIAL CALENDAR

**Toulouse, FRANCE, Ann Arbor, ETATS-UNIS, January 26, 2016** – **Cerenis Therapeutics (FR0012616852-CEREN)**, an international biopharmaceutical company dedicated to the discovery and development of innovative HDL therapies (“good cholesterol”) for treating cardiovascular and metabolic diseases, today announces its financial calendar for 2016.

Events	Date*
▪ <b>2015 Full Year Sales:</b>	<b>February 16, 2016</b>
▪ <b>2015 Full Year Results:</b>	<b>March 1<sup>st</sup>, 2016</b>
▪ <b>2016 First Quarter Sales:</b>	<b>May 3, 2016</b>
▪ <b>Annual General Meeting:</b>	<b>June 10, 2016</b>
▪ <b>2016 Half Year Sales:</b>	<b>July 28, 2016</b>
▪ <b>2016 Half Year Results:</b>	<b>September 5, 2016</b>
▪ <b>2016 Third Quarter Sales:</b>	<b>November 7, 2016</b>

\* Indicative dates which may be subject to change. With some exceptions, press releases are distributed after the financial markets closure.

**About Cerenis Therapeutics:** [www.cerenis.com](http://www.cerenis.com)

Cerenis Therapeutics is an international biopharmaceutical company dedicated to the discovery and development of innovative HDL therapies for the treatment of cardiovascular and metabolic diseases. HDL is the primary mediator of the reverse lipid transport, or RLT, the only natural pathway by which excess cholesterol is removed from arteries and is transported to the liver for elimination from the body.

Cerenis is developing a portfolio of HDL therapies, including HDL-mimetics for the rapid regression of atherosclerotic plaque in high-risk patients such as post-ACS patients and patients with HDL deficiency, and drugs which increase HDL for patients with low number of HDL particles to treat atherosclerosis and associated metabolic diseases.

Cerenis is well-positioned to become one of the leaders in the HDL therapeutic market, with a broad portfolio of programs being developed.

Since its inception in 2005, the company has been funded by top tier investors: Sofinnova Partners, HealthCap, Alta Partners, EDF Ventures, Daiwa Corporate Investment, TVM Capital, Orbimed, IRDI/IXO Private Equity and Bpifrance (Fund for Strategic Investment) and last March successfully completed an IPO on Euronext raising €53.4m.

#### About CER-001:

CER-001 is an engineered complex of recombinant human apoA-I, the major structural protein of HDL, and phospholipids. It has been designed to mimic the structure and function of natural, nascent HDL, also known as pre-beta HDL. Its mechanism of action is to increase apoA-I and the number of HDL particles transiently, to stimulate the removal of excess cholesterol and other lipids from tissues including the arterial wall and to transport them to the liver for elimination through a process called Reverse Lipid Transport. Previous Phase II studies have provided important data demonstrating the efficacy of CER-001 in regressing atherosclerosis in several distinct vascular beds in patients representing the entire spectrum of cholesterol homeostasis. The totality of the data to date indicates that CER-001 performs all of the functions of natural pre-beta HDL particles and has the potential to be the best-in-class HDL mimetic in the market.
